

Destination XL Group, Inc. Reports Holiday Sales Results

January 8, 2024

Narrows 2023 Full-Year Sales Guidance to \$520.0 million to \$525.0 million

CANTON, Mass., Jan. 08, 2024 (GLOBE NEWSWIRE) -- [Destination XL Group, Inc.](#) (NASDAQ: DXLG), the leading integrated-commerce specialty retailer of Big + Tall men's clothing and shoes, today announced the following results for the 9-week holiday sales period ended December 30, 2023 (unaudited):

- Total sales were \$102.4 million compared to \$111.7 million for the 9-week holiday sales period ended December 31, 2022.
- Comparable sales for the same 9-week holiday period decreased 8.7%, with comparable sales decreases of 7.6% from stores and 10.9% from the direct business.

Based on the holiday sales results and expectations for the remainder of the fourth quarter, the Company is narrowing its guidance for fiscal 2023 as follows:

- Total sales for fiscal 2023 are expected to be \$520.0 million to \$525.0 million, or the lower half of its previous guidance of \$520.0 million to \$530.0 million.
- Net income of \$0.39 to \$0.43 per diluted share, as compared to its previous guidance of \$0.39 to \$0.46 per diluted share. Adjusted net income of \$0.45 to \$0.49 per diluted share, as compared to its previous guidance of \$0.45 to \$0.52 per diluted share. Adjusted net income is a non-GAAP measure.
- Adjusted EBITDA margin of 10.0% to 10.5%, as compared to its previous guidance of 10.0% to 11.0%. Adjusted EBITDA margin is a non-GAAP financial measure.

"Our sales results for the 9-week holiday period were disappointing, but not unexpected. We started the quarter with a high, single-digit negative comp and that is exactly where we ended the holiday period. Lower traffic to both the stores and our website was the primary reason for the decline in sales. Despite the challenges with traffic, we resisted the temptation to stimulate sales by becoming hyper-promotional, which we believe also resulted in softer conversion online. Conversely, staying the course as we continue to rebuild the DXL brand avoided further erosion in gross margin with unnecessary markdowns. This strategy was made possible because of our clean inventory position and our disciplined approach to inventory management," said Harvey Kanter, President and Chief Executive Officer.

The Company plans to report its actual fourth-quarter and fiscal 2023 financial results on March 21, 2024, when management will also conduct its quarterly conference call to discuss its results. The earnings call will be hosted by Harvey Kanter, President and Chief Executive Officer, and Peter Stratton, Executive Vice President, Chief Financial Officer, and Treasurer.

Non-GAAP Measures

In addition to financial measures prepared in accordance with U.S. generally accepted accounting principles ("GAAP"), this press release contains a projection for adjusted net income, adjusted net income per share and adjusted EBITDA margin for fiscal 2023, non-GAAP measures. The presentation of these non-GAAP measures is not in accordance with GAAP and should not be considered superior to or as a substitute for net income, or any other measure of performance derived in accordance with GAAP. In addition, not all companies calculate non-GAAP financial measures in the same manner and, accordingly, the non-GAAP measures presented in this release may not be comparable to similar measures used by other companies. The Company believes the inclusion of these non-GAAP measures help investors gain a better understanding of the Company's performance, especially when comparing such results to previous periods, and that it is useful as an additional means for investors to evaluate the Company's operating results when reviewed in conjunction with the Company's GAAP financial statements.

Adjusted net income and adjusted net income per diluted share are calculated by excluding any asset impairment charge (gain) and the loss from the termination of the retirement plans, subtracting the actual income tax provision (benefit) and applying an effective tax rate of 27%. The Company believes that this comparability is useful in comparing the actual results period to period. Adjusted net income per diluted share is then calculated by dividing the adjusted net income by the weighted average shares outstanding for the respective period, on a diluted basis.

Adjusted EBITDA is calculated as earnings before interest, taxes, depreciation and amortization and adjusted for the loss from the termination of the retirement plans and asset impairment charge (gain), if any. Adjusted EBITDA margin is calculated as adjusted

EBITDA divided by total sales. The Company believes that providing adjusted EBITDA and adjusted EBITDA margin is useful to investors to evaluate the Company's performance and are key metrics to measure profitability and economic productivity.
